E. SESSION SUMMARY:

The target has a rounded shape with something protruding out of the side. This thing that protrudes seems to be an important part of the target. It is a curved "nudge" that I am continuously drawn to. There is a rounded thing with a reddish/blue color. There is something shiny and metallic. There is activity associated with this target. The target is located in a wide, flat, open area. (Possibly Colombia, South America.)

There are a series of constant contrasts: There is something curved next to something flat; there is something large and other things are small in relation to it; there is a loud, unpleasant noise, but the reddish/blue thing is beautiful to look at. There is something dark immediately next to something light; something cold yet warm; and there is something jagged yet smooth. It is

very confusing to understand. It makes me think that I am looking at the object through dirty, or broken glass and am unable to see the entire picture.

There is also a long, narrow, rectangular shape. Something about the angle makes me think of a woman in a long white gown, holding something up high over her left shoulder. Her hair is light in color and she is wearing it pinned up.
